

Can Lid Sizes

There are two common 12 and 16 ounce can lid sizes. Major US breweries are in the process of changing their can lids from the larger size #4 to the smaller size #2. Most soft drink can lids are size #2. The following table identifies the latest information we have on the brands affected.

<u>Size #2 (small)</u>	<u>Size #4 (large)</u>
Most Anheuser-Busch cans	Some Miller cans
Some Miller cans	Most Coors cans
Most Canadian beer cans	
Most soft drink & soda cans	

An easy way to check the can lid size is to use a place a Coke or Pepsi can lid to lid with the unknown can. If the unknown can lid is the same as the Coke/Pepsi can lid, then it is size #2. If the unknown can lid is larger than the Coke/Pepsi can lid, then it is size #4.

The customer assumes all responsibility in knowing their can lid size.
